

Semi-annual flushing of hydrants

Champlain Township advises residents that the Ontario Clean Water Agency will flush fire hydrants as of May 4, 2015 in the Vankleek Hill, L'Orignal and parc Laurentian Park areas as part of its spring maintenance program.

This procedure will ensure that the fire hydrants remain in good working order and it will dislodge any rust particles from the watermains. Consequently, your water pressure may diminish at home and there might be a slight discoloration (light red). However, this will be temporary; please run your cold water faucet for a short time to rectify this situation.

If you have any questions about this maintenance program, please contact our Public Works department at 613-678-2125.
