

## **Water Samples Following L'Original Flood**

Important notice to L'Original residents affected by the flood. If you want to leave your well water samples (thanks to the bottle kits supplied by Public Health Ontario) to the Hawkesbury office (134, Main Street) of the Eastern Ontario Health Unit (EOHU), staff can only accept water samples until tomorrow (Thursday, May 18, 2017) on account of the long weekend. Furthermore, to ensure proper handling of the water samples, the bottles are to be kept cold and not left out to ambient air (example: such as outside the door during the lunch hour). Finally, office hours to drop off your samples are from 8 :30 a.m. to 12 :00 (closed for lunch) and from 1 p.m. to 1:30 p.m. as the Purolator messenger service leaves that office at that time. You may drop off later samples during those same business hours as of next Tuesday.

Meanwhile, Champlain Township continues to offer bottled water to affected residents. You may pick some up at the Chalet-abri (772 Front Road West) in L'Original between 8 a.m. and 4 p.m. 7 days a week until further notice.
