

## WATERSHED CONDITIONS: WATER SAFETY STATEMENT

January 22, 2018

South Nation Conservation cautions that watercourses are expected to rise over the next week due to above-freezing temperatures and rainfall.

Environment and Climate Change Canada forecasts 5 to 15 mm of freezing rain throughout the region on Monday night and Tuesday morning. Freezing temperatures are forecasted early Tuesday morning and will rise throughout the day.

Water levels across the jurisdiction are currently above normal. The upcoming forecast may cause water levels to rise due to the forecasted rain and associated snowmelt.

**Residents are advised to stay away from rivers as the forecasted weather may rapidly increase river flows and cause slippery river banks. Parents are encouraged to explain these dangers to their children.**

SNC staff will continue to monitor the water levels and weather forecasts as part of the Flood Forecasting and Warning Program and will provide updates in the event conditions change.

SNC encourages the public to visit [www.nation.on.ca](http://www.nation.on.ca) and to also provide feedback with respect to changes in water related conditions in their local areas. All feedback can be sent to [waterwatch@nation.on.ca](mailto:waterwatch@nation.on.ca); posted on our Facebook ([/SouthNationConservation](https://www.facebook.com/SouthNationConservation)), or Tweet us your photos ([@SouthNationCA](https://twitter.com/SouthNationCA)).

For more information, please contact Omar Kana'n at 1-877-984-2948 ext. 309.

This statement is in effect until Wednesday, January 24, 2018.
